Gutter Inlet

Integrated planter
helps naturalize the
Rain Barrel into the
landscape design

Internally designed overflow
keeps plumbing out of sight

BENEFITS OF HARVESTING RAINWATER

- It's SIMPLE. The RainXchange™ Rain Barrel can be incorporated into existing gutter and drainage systems.
- It's RESPONSIBLE. Water restrictions do not apply to rain barrels. Storing rain water allows you to keep gardens growing during watering restrictions and reduce the burden for municipal water.
- It's BENEFICIAL. Rain water is better for plants than municipally treated water.
